This report provides a detailed snapshot of our nation's passion for wildlife and nature. It serves as a road map to guide efforts to reach more Americans to provide them with opportunities to hunt, fish, and enjoy America's wildlife and wild places. Bird/wildlife watching, hunting, fishing are not just favorite pastimes, but they share revenues from sale of licenses and tags, as well as excise taxes paid by hunters, anglers, and shooters to continue to support vital wildlife and habitat conservation efforts in every state. The report outlines the details for compilation of information and surveys to different populations and provides highlights along with statistical information represented in tables from the data collected. Zeolite scientists, whether they are working in synthesis, catalysis, characterization or application development, use the Atlas of Zeolite Framework Types as a reference. It describes the main features of all of the confirmed zeolite framework structures, and gives references to the relevant primary structural literature. Since the last edition 34 more framework types have been approved and are described in this new edition. A further new feature will be that characteristic building units will be listed for each of the framework types. Zeolites and their analogs are used as desiccants, as water softeners, as shape-selective acid catalysts, as molecular sieves, as concentrators of radioactive isotopes, as blood clotting agents, and even as additives to animal feeds. Recently, their suitability as hosts for nanometer spacing of atomic clusters has also been demonstrated. These diverse applications are a reflection of the fascinating structures of these microporous materials. Each time a new zeolite framework structure is reported, it is examined by the Structure Commission of the International Zeolite Association (IZA-SC), and if it is found to be unique and to conform to the IZA-SC's definition of a zeolite, it is assigned a 3-letter framework type code. This code is part of the official IUPAC nomenclature for microporous materials. The Atlas of Zeolite Framework Types is essentially a

compilation of data for each of these confirmed framework types. These data include a stereo drawing showing the framework connectivity, features that characterize the idealized framework structure, a list of materials with this framework type, information on the type material that was used to establish the framework type, and stereo drawings of the pore openings of the type material. \* Clear stereo drawings of each of the framework types \* Description of the features of the framework type, allowing readers to quickly see if the framework type is suitable to their needs \* References to isotypic materials, readers can quickly identify related materials and consult the appropriate reference

Investigative report of the events leading to the raid of the Branch Davidian Compound near Waco, Texas, on February 28, 1993.

The complete story of the legendary Honda V4 motorcycles and the four-stroke engine design that gave them the name. Including full production histories, comprehensive specification details and over 250 colour illustration, the book covers design and development of the first Honda V4, the oval piston NR500, and the VF road models from 1982-1988. Also covered: the iconic sport touring bikes, the VFR750, VFR800 and VFR1200F; the worldwide racing success for Honda Racing Corporation's RC30; the 1990 Pan European/ST1100, with its longitudinal V4 engine, and the 2002 ST1300; Honda V4s in MotoGP; details of the 2014 VFR800 and CTX1300 cruiser and finally, owners' experiences and insight from those who worked in the industry. Fully illustrated with 256 colour photographs and comprehensive specification details.
