Effective Interviewing and Interrogation Techniques, Second Edition, is completely revised and updated so as to cover all the information a student needs to know to obtain answers from a witness, a victim, or a suspect and how to interpret these answers with the utmost accuracy. Building on the previous edition's ground-breaking search for truth in criminal and non-criminal investigations, this book contains five new chapters which include coverage of false confessions, interviewing the mentally challenged, and the ethics of interrogation in a post 9/11 world. This new edition includes highly illustrated chapters with topics ranging from the psychophysiological basis of the forensic assessment to preparation for the interview/interrogation; question formulation; projective analysis of unwitting verbal clues; interviewing children and the mentally challenged; and pre-employment interviewing. Also included are several model worksheets and documents, case studies, and complete instructions for using the authors' Integrated Interrogation Technique, a 10-point, highly successful approach to obtaining confessions that can stand up in court. The book concludes with an insightful look at the future of truth verification. This book will be of benefit to attorneys, coroners, detectives, educators, forensic psychophysiologicals (lie detection), human resource professionals, intelligence professionals, and investigators as well as journalists/authors, jurists, medical professionals, psychological professionals, researchers, and students. - Expanded coverage of Statement Analysis, including actual statements from real cases. - New photos to aid in assessing nonverbal behavior. - Added section on assessment of written statements.

"Texts must be interesting enough for students to want to read them in their own language. Otherwise, how can we expect students to want to read them in English?" This is the authors' golden rule when they choose texts and topics for every level of American English File. It ensures you get material that learners will enjoy reading and will want to talk about. Texts such as "Could you live without money?" really help to generate opinion and discussion. They create a desire to communicate. Having created the desire, American English File then helps you to develop learners' communication skills. One way it does this is with a strong focus on pronunciation. Research shows that poor pronunciation is a major contributor to breakdowns in communication (Jennifer Jenkins: The Phonology of English as an International Language).

American English File integrates pronunciation into every lesson - the "little and often" approach. But that's not all. The unique English File Sounds Chart puts a picture to each sound in the phonetic alphabet, so learners find it easier to remember the sounds and, ultimately, improve their pronunciation.

The Latin for Children Primer C is the third and final text in the LFC series. Grammar training continues, and students are encouraged to do more reading in Latin by following along with a running story through the text. Each workbook text is engaging, incremental, creative. Exercises, tests, and a sizable and useful reference section are also included. Lessons include a plethora of mnemonic aids (songs, chants) that enable students to learn vocabulary and grammar with ease and delight.

From tween advocate for limb difference and founder of Project Unicorn Jordan Reeves and her mom, Jen, comes an inspiring memoir about how every kid is perfect just the way they are. When Jordan Reeves was born without the bottom half of her left arm, the doctors reassured her parents that she was "born just right." And she has been proving that doctor right ever since! With candor, humor, and heart, Jordan's mother, Jen Lee Reeves, helps Jordan tell her story about growing up in an able-bodied world and family, where she was treated like all of her siblings and classmates—and where she never felt limited. Whether it was changing people's minds about her capabilities, trying all kinds of sports, or mentoring other kids, Jordan has channeled any negativity into a positive, and is determined to create more innovations for people just like her. Her most famous invention, aptly called Project Unicorn, is a special prosthetic (that shoots glitter!) made with the help of a 3-D printer. A real-life superhero, Jordan is changing the world with her foundation, Born Just Right, which advocates and celebrates kids with differences, and helps them live their best possible life—just like Jordan is today!

Although ten-year-old Miguel is at first embarrassed by his colorful aunt, Tia Lola, when she comes to Vermont from the Dominican Republic to stay with his mother, his sister, and him after his parents' divorce, he learns to love her.
