How to Become IDEA Certified . You can become IDEA certified in one of two ways: Training Option: Candidates have one year after completing the required courses to apply for certification Experience Option: Candidates must submit the following documentation to demonstrate their experience Minimum two-page description of your experience using IDEA

Contains the proceedings of the oversight hearing before the Subcommittee on Personnel of the Committee on Armed Services, U.S. Senate. Statements are presented by members of Congress with witness testimony from relatives of military personnel who have lost their lives and representatives from the U.S. Army Criminal Investigation Command, the Dept. of Defense; the Air Force Office of Special Investigations; and the Naval Criminal Investigative Services as well as other investigative and armed forces personnel. Additional prepared statements are included from relatives of military personnel and members of the armed services.

CELLULAR V2X FOR CONNECTED AUTOMATED DRIVING A unique examination of cellular communication technologies for connected automated driving, combining expert insights from telecom and automotive industries as well as technical and scientific knowledge from industry and academia Cellular vehicle-to-everything (C-V2X) technologies enable vehicles to communicate both with the network, with each other, and with other road users using reliable, responsive, secure, and high-capacity communication links. Cellular V2X for Connected Automated Driving provides an up-to-date view of the role of C-V2X technologies in connected automated driving (CAD) and connected road user (CRU) services, such as advanced driving support, improved road safety, infotainment, over-the-air software updates, remote driving, and traffic efficiency services enabling the future large-scale transition to self-driving vehicles. This timely book discusses where C-V2X technology is situated within the increasingly interconnected ecosystems of the mobile communications and automotive industries. An expert contributor team from both industry and academia explore potential applications, business models, standardization, spectrum and channel modelling, network enhancements, security and privacy, and more. Broadly divided into two parts—introductory and advanced material—the text first introduces C-V2X technology and introduces a variety of use cases and opportunities, requiring no prerequisite technical knowledge. The second part of the book assumes a basic understanding of the field of telecommunications, presenting technical descriptions of the radio, system aspects, and network design for the previously discussed applications. This up-to-date resource: Provides technical details from the finding of the European Commission H2020 5G PPP 5GCAR project, a collaborative research initiative between the telecommunications and automotive industries and academic researchers Elaborates on use cases, business models, and a technology roadmap for those seeking to shape a start-up in the area of automated and autonomous driving Provides up to date descriptions of standard specifications, standardization and industry organizations and important regulatory aspects for connected vehicles Provides technical insights and solutions for the air interface, network architecture, positioning and security to support vehicles at different automation levels Includes detailed tables, plots, and equations to clarify concepts, accompanied by online tutorial slides for use in teaching and seminars Thanks to its mix of introductory content and technical information, Cellular V2X for Connected Automated Driving is a must-have for industry and academic researchers, telecom and automotive industry practitioners, leaders, policymakers, and regulators, and university-level instructors and students.

As many more companies implement Linux alongside Windows, there is a critical need for guidance on how to make the two systems work together effectively. Addressing version 2.4 of the Linux kernel, this book provides network managers and system administrators with the most up-to-date working resource for all their Linux with Windows 2000 integration questions. Expert Ross Brunson uses many practical examples to help explain all topics from the ground up, including archi-tectures and features, strengths and weaknesses of both systems, protocols, system administration, various cross-platform operations, and finally, configuration and troubleshooting.

DuBois organizes his cookbook's recipes into sections on the problem, the solution stated simply, and the solution implemented in code and discussed. The implementation and discussion sections are the most valuable, as they contain the command sequences, code listings, and design explanations that can be transferred to outside projects.

"There's no margin for mistakes in submarines. You're either alive or dead." —Richard O'Kane Hailed as the ace of aces, captain Richard O'Kane, winner of the Congressional Medal of Honor for his consummate skill and heroism as a submarine skipper, sank more enemy ships and saved more downed fliers than anyone else. Now Pulitzer Prize-winning author William Tuohy captures all the danger, the terror, and the pulse-pounding action of undersea combat as he chronicles O'Kane's wartime career-from his valiant service as executive officer under Wahoo skipper Dudley "Mush" Morton to his electrifying patrols as commander of the USS Tangand his incredible escape, with eight other survivors, after Tang was sunk by its own defective torpedo. Above all, The Bravest Manis the dramatic story of mavericks who broke the rules and set the pace to become a new breed of hunter/killer submariners who waged a unique brand of warfare. These undersea warriors would blaze their own path to victory-and transform the "Silent Service" into the deadliest fighting force in the Pacific.

The boisterous freedom promised by the First Amendment is both the heart of American experiment and the fissure along which it divides itself. Those who would fight freedom's enemies, from political correctness to corporate intimidation to outright censorship, face powerful adversaries. But they also have a potent weapon at their disposal: good, old-fashioned talk--tough talk. And as one of America's leading First Amendment attorneys, Martin Garbus is one of the toughest talkers there is. Starting with his work on the tam that defended the legendary satirist Lenny Bruce against obscenity charges, Garbus has been a fearless advocate for some of the most important voices of our time, among them union organizer Cesar Chavez, actor Robert Redford, director Spike Lee, writer Samuel Beckett, Russian dissident Andrei Sakharov, and Czech playwright Vaclav Havel, who, as president of his country's revolutionary government, invited Garbus to help write the nation's constitution. But Garbus is not an ivory-tower theoretician. He is a highly effective defense lawyer who takes on cases with the full intent of winning. In Tough Talk, Garbus goes behind the scenes to show us how our system really works and what he does to make it work for his clients. How does an attorney get controversial cases? What does he do to gain control of a hostile courtroom? How does he work with a defendant whose beliefs are the opposite of his own? Tough Talk is both the story of one man's battle for freedom and a clear-eyed account of every major First Amendment issue this nation has faced in the last three decades, for the battles Garbus has fought have become the touchstones of America's debate about the limits of freedom. In showing us how he has

harnessed his personal idealism to the gritty reality of the courtroom, Garbus gives brilliant testimony to the power of tough talk.
