"Christ in Concrete takes place on the Lower East Side of New York City shortly before the Great Depression and portrays people rarely seen in American literature - the hardworking Italian immigrants who joined the construction trade and lived in the tenements near the waterfront." "Largely autobiographical, Christ in Concrete opens with the dramatic Good Friday collapse of a building under construction, which buries in its rubble the bricklayers working on the upper floors and literally crucifies in concrete Geremio, whose death leaves his pregnant wife and eight children impoverished. His bright, studious oldest son, Paul, at just twelve years of age, must take over his father's role - and job."--BOOK JACKET.

Many communities are ravaged by problems associated with poverty, crime and drug and alcohol abuse. Substantial answers to the urban crisis are all but non-existent. 'Christ, the Cross and the Concrete Jungle' is the story of a young man's deliverance from a lifestyle of desperation and delinquency to a new life of freedom and hope. This books reveals the remarkable journey of transformation and redemption that is made possible through the gospel of Jesus Christ.

The award-winning author of The Holy Longing draws on theological and scholarly sources to counsel Christian readers on the relevance of the Eucharist to the faith, offering insight into the myriad traditions observed by various denominations.

In the context of the present-day religious pluralism and meeting of religions, we cannot afford to ignore the subject of religious phenomenology. Non-Christian religious traditions have confronted in their own way the problems that arise from human conditions with respect to the meaning, and goal of life. The answers to these problems given by the phenomenology of religions cannot be lightly disposed of as irrelevant to the theological reflections.

Drawing on the best English and German language scholarship to date, this book offers a novel interpretation of Barth's mature Christology. Examining the entirety of the Dogmatics, it provides a nuanced analysis of Barth's treatment of the Chalcedonian Definition, the enhypostasis/anhypostasis pairing, and various Protestant scholastic Christological distinctions; an examination of the co-inherence of Barth's doctrines of God and Christ, which contributes to current debates about Barth's doctrine of election; and a lengthy account of the Christology of Church Dogmatics IV that foregrounds Barth's understanding of Christ's human involvement in the drama of reconciliation. Throughout the text, the author shows convincingly that Barth's emphasis on Christ's divinity goes hand-in-hand with a dogmatically rich and often startling account of Christ's humanity. The text does not confine itself to the Church Dogmatics. It also situates Barth in the context of the wider Christian tradition and modern western philosophy of religion. Thus Barth is set in conversation with a wide range of thinkers, including Anselm of Canterbury, Martin Luther, John Calvin, Friedrich Schleiermacher, G. W. F. Hegel, Gottfried Thomasius, and Harry Frankfurt. In addition, the text makes a number of constructive gestures, showing a particular interest in feminist and liberationist trajectories of thought. The final chapter considers the standing of Barth's Christology today and its pertinence for theological ethics and political theology.

"Christ in Concrete takes place on the Lower East Side of New York City shortly before the Great Depression and portrays people rarely seen in American literature - the hardworking Italian immigrants who joined the construction trade and lived in the tenements near the waterfront." "Largely autobiographical, Christ in Concrete opens with the dramatic Good Friday collapse of a building under construction, which buries in its rubble the bricklayers working on the upper floors and literally crucifies in concrete Geremio, whose death leaves his pregnant wife and eight children impoverished. His bright, studious oldest son, Paul, at just twelve years of age, must take over his father's role - and job."--BOOK JACKET.

It was the conviction of the Swiss theologian Hans Urs von Balthasar (1905-1988) that the reservation of priestly ordination to men is intrinsically connected to the significance of the incarnation of Christ as a male. Von Balthasar was convinced that the incarnation of the eternal Son as male plays an intrinsic role in his economic mission. The present study is an attempt to understand the teaching of the Magisterium reserving priestly ordination to men by an exposition and analysis of the revelatory significance of the incarnation of Christ as male, and the relation of his maleness to priestly ordination according to the theology of von Balthasar.

Acts is the sequel to Luke's gospel and tells the story of Jesus's followers during the 30 years after his death. It describes how the 12 apostles, formerly Jesus's disciples, spread the message of Christianity throughout the Mediterranean against a background of persecution. With an introduction by P.D. James

An introduction to missionary communication. Examines world views, cognitive processes, linguistic forms, behavioral patterns, social structures, communication media, and motivational sources. Indexed. Copyright © Libri GmbH. All rights reserved.

The mechanisms by which buildings and infrastructures degrade are complex, as are the procedures and methods for inspection and for rehabilitation. This book examines the various problems caused by non-uniform deformation changes, poor durability, and natural and human disasters such as earthquakes and fire. Attention is given to the causes and mechanisms of the deterioration. General procedures and commonly used techniques for inspection and evaluation of existing infrastructures are introduced. The desk study, destructive test, and non-destructive test are discussed - in particular the newly developed non-destructive methods for deterioration monitoring. The book then moves on to conventional renovation techniques such as patch and steel plate strengthening, which meet the requirements of normal practice. Special attention is paid to compatibility between repair materials and degraded materials. Fibrous composite materials are then introduced as a basis for innovative repair techniques, and different fibre and matrix properties are outlined, as are newly developed inorganic binders as a matrix for fibrous composites. Finally, advanced rehabilitation techniques using fibrous composite are described. Fundamental issues such as bonding and failure mechanisms are then discussed in detail. Fibrous composite strengthening techniques for beam, wall, column and slabs are covered, including shear strengthening, flexural strengthening, and fillet winding, as are codes of practice for retrofitting with fibrous composites. This caters to students and academics world-wide and serves as a "tool book" for concrete and structural engineering professionals.
