Using the engine oil finder will ensure you get the right spec oil for your car. Bear in mind that more than one grade of oil might be recommended. For example, 5w30 engine oil and 10w40 engine oil might be suitable for your car. The oil finder system also tells you how much oil your car needs and how often you need to change your oil. It really does take all the guesswork away when selecting which engine oil suits your car.

Here are a few reasons why the Peugeot / Citroen / Ford HDI turbo fails on these engines? Oil Blockage and carbon build-up. With the high amount of carbon build-up these Peugeot HDI engines can suffer from oil blockages. They have oil pipes to and from the turbo which lets the oil pass, keeping the bearings inside the turbo lubricated.

HDi (High Pressure Direct Injection) is a diesel engine designed by the PSA Peugeot Citroen group provided with the common rail direct fuel injection system. The first generation HDi engines were launched in 1998. All the engines of this range had 4 cylinders and complied with Euro 4 eco standards, that controls emission of pollutants in exhaust gas.

~~What is HDi, e HDi, BlueHDi? Engine performance ...~~

BlueHDi Diesel Engines The BlueHDi diesel engines benefit from technology which reduce fuel consumption and CO2 emissions, allowing them to comply with Euro 6.2 standards. The Catalyst SCR (Selective Catalytic Reduction), positioned upstream of the additive particulate filter, makes it possible to eliminate 90% of the nitrogen oxides (NOx) emitted by the engine.

A guide to the trends and leading companies in the engineering, research, design, innovation and development business fields: those firms that are dominant in engineering-based design and development, as well leaders in technology-based research and development.

Singapore's best homegrown car magazine, with an editorial dream team driving it. We fuel the need for speed!

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

Since the beginning of the century, electrical goods have invaded our everyday lives. Now, electric power is coming to be seen as a solution to the pollution caused by cars. While this transition has remained very slow during the last ten years, it has been accelerating as the statutory constraints and needs of the market have changed. Even if the electric car itself fails to dominate the market, electric traction is taking an important place in our drive to move away from gas-powered vehicles. Another solution, hybrid vehicles, combine two sources of energy (electric and chemical), reducing the global consumption of fossil fuels. Fuel cell vehicles are also one of the most promising technologies for the future, with the capacity to use any fuel - hydrogen being the ideal fuel ecologically, but constrained by infrastructure and storage issues. This book explores all these different solutions for moving our vehicles from fossil fuel consumption to new, more environmentally-friendly power sources.
