Boats are used less frequently and in a sailboat the engine is used even less as the primary method of propulsion are the sails and the wind. It is not uncommon to find 30 year old engines in very good shape. The use of a marine engine is measured in hours and a diesel engine can easily go 10,000 hours before requiring a rebuild.

The OXE Diesel is the only outboard engine built particularly with commercial users in mind. It is designed for those who use their boat every day, no matter the conditions, and have to rely on the units for many hours every year. The innovation fills a new segment in the marine industry and cannot be compared to anything on the market today.
