This book discusses reforms that should be undertaken in secondary education to support Ethiopia's transition from a low- to middle-income economy. The most critical reform identified is the introduction of a flexible curriculum that serves the needs of all students, including those who may not pursue higher education.

Collection of articles examining some of the latest work in the understanding of physics.

Give students the essential thinking skills they need to thrive. Exclusively content-focused teaching may improve test scores, but it leaves students without the cognitive skills for success in an information-overloaded world where deep thinking, collaborative problem solving, and emotional intelligence is essential. In this book, David Hyerle presents case studies of schools and educators who have applied these powerful models, in some case system-wide, to remedy this situation, including: Visual learning tools including Hyerle's renowned Thinking Maps A language for students to improve their intellectual-emotional behaviors as they learn A system for developing students' abilities to ask questions in the context of a developing Community of Inquiry

Provide your students with frequent, focused skills practice with this Reproducible Teacher's Edition. The reproducible format and additional teacher resources give you everything you need to help students master and retain basic skills.

Teacher's Guide to correspond with theme

This publication reflects the results of the Ethiopian education reform as well as the exceptional efforts that multiethnic Ethiopia undertakes in order to cope with the challenges arising from the population explosion. More than 55 per cent of the 77 million Ethiopians are under the age of 18 years. The great social and political changes started in Ethiopia at the beginning of the 1990s have resulted in the substitution of the educational system based on Amharic and English by one which uses a multilingual approach. According to the Ministry of Education 22 out of the 84 languages spoken in Ethiopia are now used as media of instruction in primary schools. The book presents the lectures delivered at the workshop "On the Results of the Reform in Ethiopia's Language and Education Policy" held at Addis Ababa University in April 2006 by Ethiopian education experts and a German research team. Their contribution has facilitated a subsumption into the historical context and has given insight into the analyses of the use of 8 Ethiopian languages in primary schools in different regions of the country.

This book presents an international perspective of the influence of educational context on science education. The focus is on the interactions between curriculum development and implementation, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc.).
