Exchange of information and innovative ideas are necessary to accelerate the development of technology. With advent of technology, intelligent and soft computing techniques came into existence with a wide scope of implementation in engineering sciences. Keeping this ideology in preference, this book includes the insights that reflect the 'Advances in Computer and Computational Sciences' from upcoming researchers and leading academicians across the globe. It contains high-quality peer-reviewed papers of 'International Conference on Computer, Communication and Computational Sciences (ICCCCS 2016), held during 12-13 August, 2016 in Ajmer, India'. These papers are arranged in the form of chapters. The content of the book is divided into two volumes that cover variety of topics such as intelligent hardware and software design, advanced communications, power and energy optimization, intelligent techniques used in internet of things, intelligent image processing, advanced software engineering, evolutionary and soft computing, security and many more. This book helps the perspective readers' from computer industry and academia to derive the advances of next generation computer and communication technology and shape them into real life applications.

Covers quality of content, types of articles, manuscript structure, writing style, grammar, quotations, tables, footnotes, proofreading, and journal policies.

This volume of the journal contains papers presented at the International Conference on Materials Engineering and Science (IConMEAS 2018), held at Istanbul, Turkey, August 08-09, 2018 and focuses on the research results in the field of materials science for various branches of industry and construction.

Segulung ijazah menjadi impian ramai. Tidak semua bernasib baik mendapatkannya secara saluran utama. Tawaran PJJ (pendidikan jarak jauh) adalah peluang terbaik. Namun, mereka yang pastinya telah mempunyai komitmen (bekerja dan/atau berkeluarga) tetapi masih menyimpan impian ini, tetap dibelenggu pelbagai persoalan tentang PJJ. Apakah sebenarnya PJJ? Sesuikah menjadi pelajar jarak jauh? Apakah ciri-ciri dan gaya pembelajaran seorang pelajar jarak jauh? Bagaimanakah proses pengajaran dan pembelajarannya? Apakah cabaran yang harus ditempuhi? Mampukah PJJ ditempuhi dengan jayanya? Bagaimanakah hendak diuruskan masa antara kerjaya dan pengajian? Apakah tip untuk berjaya dalam PJJ? Semua persoalan ini dikupas dengan rapi di dalam buku ini. Sebagai perintis dalam PJJ di Malaysia, penulis mengaplikasikan pengalaman dan kepakaran luas beliau dalam membincangkan tentang keseluruhan aspek PJJ – variasi pengajaran PJJ), cabaran pembelajaran, ciri dan gaya pembelajaran pelajar dan juga strategi kejayaan. Penulisan buku ini ditujukan khas untuk bakal pelajar dan pelajar jarak jauh institusi pengajian tinggi Malaysia untuk berjaya dengan cemerlang. Buku ini juga relevan untuk panduan pelajar sepenuh masa sistem konvensional di dalam kampus.

The Panel on Statistical Methods for Testing and Evaluating Defense Systems had a broad mandate-to examine the use of statistics in conjunction with defense testing. This involved examining methods for software testing, reliability test planning and estimation, validation of modeling and simulation, and use of modem techniques for experimental design. Given the breadth of these areas, including the great variety of applications and special issues that arise, making a contribution in each of these areas required that the Panel's work and recommendations be at a relatively general level. However, a variety of more specific research issues were either brought to the Panel's attention by members of the test and acquisition community, e.g., what was referred to as Dubin's challenge (addressed in the Panel's interim report), or were identified by members of the panel. In many of these cases the panel thought that a more in-depth analysis or a more detailed application of suggestions or recommendations made by the Panel would either be useful as input to its deliberations or could be used to help communicate more individual views of members of the Panel to the defense test community. This resulted in several research efforts. Given various criteria, especially immediate relevance to the test and acquisition community, the Panel has decided to make available three technical or background papers, each authored by a Panel member jointly with a colleague. These papers are individual contributions and are not a consensus product of the Panel; however, the Panel has drawn from these papers in preparation of its final report: Statistics, Testing, and Defense Acquisition. The Panel has found each of these papers to be extremely useful and they are strongly recommended to readers of the Panel's final report.

This book documents the trends and challenges that are taking place in various sectors in Malaysia. The chapters, written by specialists with an intimate knowledge of the country, cover many of the major issues concerning Malaysia, a country undergoing significant changes and challenges.

Complete with online files and updates, this fascinating volume has everything you need to know about the latest developments in automated timetabling. It constitutes the refereed post-proceedings of the 6th International Conference on Practice and Theory of Automated Timetabling, PATAT 2006. The 25 revised full papers are organized in topical sections that cover everything from general issues and employee timetabling, to school and examination timetabling.
