Demonstrating instructional principles discussed in David A. Sousa's *How the Brain Learns Mathematics*, this resource provides brain-friendly, ready-to-use mathematics lessons for Grades 2–3. Teachers will find step-by-step guidance and all the necessary reproducible materials for mathematics instruction that involves group work, reflection, movement, and visualization. Through activities such as Jumping Jelly Beans, Math Hockey, and Treasure Hunt, young learners will enjoy developing skills connected with number patterns and place value, multi-digit addition and subtraction, multiplication and division, fractions, measurement, geometry, and more. Aligned with NCTM standards and focal points, the instructional strategies: Enhance motivation and content retention Address individual intelligences Promote writing as an important learning tool Use concrete models to make concepts meaningful Connect mathematical ideas to the real world Teach creative problem solving Deepen and revitalize instruction using Sousa's proven brain-compatible approach for helping every student develop self-confidence in mathematics!

Invite your students to engage in these self-guided critical thinking exercises. This packet includes four units. Students will be asked to interpret geographical comparisons, formulate equations, perceive geometric figures, and more. The units may be given to individual students or small groups who might benefit from a challenge. Student Self-Check sections follow each unit, supplying correct answers as well as ideas to provoke further thinking. Challenge your students to new levels of logical thinking and doing with this innovative resource.
