The author of the international bestseller *The Rise and Fall of the Third Reich* offers a personal account of life in Nazi Germany at the start of WWII. By the late 1930s, Adolf Hitler, Führer of the Nazi Party, had consolidated power in Germany and was leading the world into war. A young foreign correspondent was on hand to bear witness. More than two decades prior to the publication of his acclaimed history, *The Rise and Fall of the Third Reich*, William L. Shirer was a journalist stationed in Berlin. During his years in the Nazi capital, he kept a daily personal diary, scrupulously recording everything he heard and saw before being forced to flee the country in 1940. *Berlin Diary* is Shirer's first-hand account of the momentous events that shook the world in the mid-twentieth century, from the annexation of Austria and Czechoslovakia to the fall of Poland and France. A remarkable personal memoir of an extraordinary time, it chronicles the author's thoughts and experiences while living in the shadow of the Nazi beast. Shirer recalls the surreal spectacles of the Nuremberg rallies, the terror of the late-night bombing raids, and his encounters with members of the German high command while he was risking his life to report to the world on the atrocities of a genocidal regime. At once powerful, engrossing, and edifying, William L. Shirer's *Berlin Diary* is an essential historical record that illuminates one of the darkest periods in human civilization.

"The basic structure of the Guide is geared towards supporting a systematic and comprehensive translation of universal human rights standards into indicators that are contextually relevant. This approach favours using objective information which is easily available, or can be collected, for monitoring the national implementation of human rights. This requires the reader to: [1] Understand the conceptual approach so as to identify indicators, after developing a preliminary understanding of the human rights normative framework; [2] Explore the alternative data-generating methods to populate the selected indicators; and [3] Apply and interpret the numbers that go with an indicator so as to build an assessment on the state of human rights."--P. 8.

"The purpose of this publication is to contribute to [the] process of clarification by explaining universally recognised human rights in a way that makes sense to business. The publication also aims to illustrate, through the use of case studies and actions, how human rights are relevant in a corporate context and how human rights issues can be managed."--Introduction, p. vii.

In this classic collection, some of the world's most eminent critics of development review the key concepts of the development discourse. Each essay examines one concept from a historical and anthropological point of view, highlights its particular bias, and exposes its historical obsolescence and intellectual sterility. The authors argue that a bidding farewell to the whole Eurocentric development idea is urgently needed, in order to liberate people's minds in both North and South for bold responses to the environmental and ethical challenges now confronting humanity. The combined result forms a must-read invitation to experts, grassroots movements and students of development to recognize the tainted glasses they put on whenever they participate in the development discourse.
