Islamic banking and economics (IBE) is a fast-growing subject of vital interest in both East and West as Muslims change their attitudes towards investments and find ways to invest their funds according to the Islamic faith. Along with the rapid developments in Islamic banking there has been a concomitant increase in the quantity of relevant IBE material generated. Since IBE is a highly specialized cross-disciplinary field involving economics, business, marketing, religion, philosophy and culture, it is difficult for researchers to locate and obtain information without having to go through several secondary sources such as indexing and abstracting services. In this electronic age, it is essential for researchers to be aware of the various forms of information available for consultation. Yet, until now, the few previous works on IBE information sources have been limited to the coverage of materials available during the early 1980s, before the most recent period of expansion, and in addition the materials cited were often unpublished and therefore unobtainable. In answer to a long-felt need, "Information Sources on Islamic Banking and Economics" provides a detailed bibliography of IBE sources concentrating on the period 1980-1990 with some data from 1991 and 1992, and with the additional unique feature of setting out, for the first time, the information infrastructure of the IBE discipline. A comprehensive author index and a keyword subject index for important terms are provided, and only published - and therefore easily obtainable - items have been included. This book is essential reading for all researchers, economists, bankers and others who need information on the increasingly important field of Islamic banking and economics, and related areas.

This book traces the rise and fall of Anglo-American relations with India and Pakistan from independence in the 1940s, to the 1960s.

An international literary sensation, this chilling thriller "exposes . . . a world so dark that readers will come away terrified" (Wall Street Journal, India). An American journalist has been kidnapped in Karachi, Pakistan, days before the American president is due to visit. Those responsible have promised to execute him on video on Christmas Day. With no other leads, Constantine D'Souza, a Christian police officer, must get his former colleague Akbar Khan, a rogue cop imprisoned for a crime he didn't commit, to help track down the journalist. But to do so, he has to navigate the streets of Karachi, where police corruption is a way of life and political motives are never what they seem. Caught between the United Front—the militant ruling party—and the Pakistani Intelligence Agencies, D'Souza is in a race against time to save a man's life and the honor of a nation. Modeled on true events, The Prisoner is a fast-paced thriller that brings the byzantine politics and the moral ambiguities of justice in Pakistan to life. With a gritty authenticity based on personal experience, Omar Hamid reveals a society where corruption and extremism are commonplace, and the line between good guys and bad guys is never as clear as we would like.

Critical Perspectives on International Political Economy considers and revises the progress of critical thinking within IPE and engages with issues such as finance, the practices of health and work, the relevance of new social movements and the political economy of the Internet. In so doing it provides a possible map for the next stage of critical development in the study of International Political Economy.

Preclassical and indigenous nonwestern military institutions and methods of warfare are the chief subjects of this annotated bibliography of works published 1967 – 1997. Emphasis is on historical studies of military organization and the relationships between military and other social institutions.

Water Resource Conflicts and International Security: A Global Perspective is an edited collection by Dhirendra K. Vajpeyi which analyzes the increasing global demand for water in economic and social development, and the dire need to efficiently manage this vital natural resource, particularly in water-scarce countries in the Middle East, Asia, and Africa. Several environmental- and human-induced factors, such as urbanization, industrialization, climate change, and agricultural needs, have created a near-crisis situation in many countries. Subsequently, there is an increasingly intense competition to utilize available water resources in these most heavily-affected regions; transboundary rivers, lakes, and streams which are shared by more than one country pose potential for political conflict, armed conflict, and, in the best of cases, cooperation. The contributors of Water Resource Conflicts and International Security present ten case studies in seven chapters, highlighting the competition between countries in Asia, Africa, and the Middle East. In his conclusion, Dhirendra K. Vajpeyi suggests several policy measures that governments may implement in order to minimize the potential for conflict.
