Dealing with such productivity improvement programmes as action learning, quality circles, inter-firm comparisons and business clinics, this book also offers information on the most important areas in which productivity can be improved and on techniques field-tested in developing countries.

This book examines industrial and employment relations in the emerging economies of Brazil, China, India, South Africa and Turkey, and assesses the contribution of industrial relations institutions to inclusive development. The book uses real-world examples to examine the evolution of industrial relations and of organised interest representation on labour issues. It reveals contested institutional pathways, despite a continuing demand for independent collective interest representation in labour relations.

This book assesses the phenomenon of international framework agreements (IFAs), examining their implementation and impact around the world as well as their promotion of ILO standards. This volume includes contributions from fifteen international specialists to give a comprehensive discussion of the 80-plus IFAs that existed in July 2010.

Aiming to help with the productivity and efficiency of garment-producing enterprises, this book suggests practical ideas for the design, materials, safety, welfare and maintenance of the business. It also presents procedures and examples for identifying and assessing productivity.

Covers the entire spectrum of modern industrial engineering from a practical standpoint. This edition adds 36 completely new chapters to provide a more cohesive structure to the discipline which it classifies under the following four areas: technology; human dimensions; planning, design, and control of operations; and quantitative methods for decision making.
