5.0 out of 5 stars Garmin echo 500c Fishfinder. Reviewed in the United States on April 6, 2014. Verified Purchase. Great product. Very accurate and the 5-Inch LCD display is a good size. I have mine set up on a portable base so I can move it anywhere on the boat. This is the 2nd Garmin I've owned and they really make a high quality product.

That's because of its powerful sonar with 500 W (RMS) power and our exclusive HD-ID! target tracking technology.

More and more sailors and powerboaters are buying and relying on electronic and electric devices aboard their boats, but few are aware of proper installation procedures or how to safely troubleshoot these devices if they go on the blink.

John C. Payne is a professional marine electrical engineer with 23 years merchant marine and off-shore oil experience.

Winner of Choice Magazines Outstanding Academic Title award, January 2005! Sharks and their relatives are the subjects of tremendous interest. The publics fascination is influenced by their roles in movies and popular literature, while the media races to cover stories of predators endangering helpless humans. The alarming threat to shark popul

Nicole is just your average teen. That is, until extraordinary events start happening. Her adventures take her to the center of the universe and the outer limits of her own potential, and along the way she discovers that not only is life full of excitement and possibility, but people are capable of things far beyond their wildest dreams. Auvreria is a dizzying ride through space, time, and fantastic realms, an education in magic, and a story of two sisters who save the universe by looking out for each other.

The evidence of women in the Americas is conspicuously absent from most historical syntheses of the Spanish invasion and early colonization of the New World. Karen Powers's ethnohistoric account is the first to focus on non-military incidents during this transformative period. As she shows, native women's lives were changed dramatically. Women in the Crucible of Conquestuncovers the activities and experiences of women, shows how the intersection of gender, race, and class shaped their lives, and reveals the sometimes hidden ways they were integrated into social institutions. Powers's premise is that women were demoted in status across race and class and that some women resisted this trend. She describes the ways women made spaces for themselves in colonial society, in the economy, and in convents as well as other religious arenas, such as witchcraft. She shows how violence and intimidation were used to control women and writes about the place of sexual relations, especially miscegenation, in the forging of colonial social and economic structures. From Karen Vieira Powers's Introduction: "During the colonization process, indigenous women suffered, perhaps, the most precipitous decline in status of any group of colonial women. For this reason, and because they were numerically superior to all other women, I have chosen to make them the heart of this book. Nevertheless, the work also treats Spanish women, racially mixed women (mestizas, mulattas, zambas, etc.), and African women."

A solo for String Bass with Piano Accompaniment, composed by Serge Koussevitzky.

A highly evocative story set in Liverpool of the 1960s. An exploration of what it was to be like to be young in the time and city of The Beatles. The joys of music and football in a golden age.

Faced with widespread and devastating loss of biodiversity in wild habitats, scientists have developed innovative strategies for studying and protecting targeted plant and animal species in "off-site" facilities such as botanic gardens and zoos. Such ex situ work is an increasingly important component of conservation and restoration efforts. Ex Situ Plant Conservation, edited by Edward O. Guerrant Jr., Kayri Havens, and Mike Maunder, is the first book to address integrated plant conservation strategies and to examine the scientific, technical, and strategic bases of the ex situ approach. The book examines where and how ex situ investment can best support in situ conservation. Ex Situ Plant Conservation outlines the role, value, and limits of ex situ conservation as well as updating best management practices for the field, and is an invaluable resource for plant conservation practitioners at botanic gardens, zoos, and other conservation organizations; students and faculty in conservation biology and related fields; managers of protected areas and other public and private lands; and policymakers and members of the international community concerned with species conservation.
