In Minecraft, several in-game systems can usefully perform information processing. The systems include water, sand, minecarts, pistons, and redstone. Of all these systems, only redstone was specifically added for its ability to manipulate information, in the form of redstone signals. Redstone, like electricity, has high reliability and high switching-speeds, which has seen it overtake the other mechanical systems as the high-tech of Minecraft, just as electricity overtook the various ...
