In the face of growing needs and problems around urbanization, the sustainable development of cities does not lie only in technology, research and innovation. Sustainable local development also results from a combination of different elements related to the development of social cohesion, the local economy, the environment and culture; also, crucially, it depends on the autonomy of local authorities and the adoption of the most appropriate system of governance. In addition, the urgent need to create better and more liveable cities is now inextricably linked with the integration of environmental principles, in order to prevent the waste of resources and mitigate climate change by restricting CO2 emissions. Within this framework, new strategies have been implemented for the development of 'New Towns' or satellite cities. &lt;B> This publication gathers together contributions from different experts involved in the EAST (Euro Asia Sustainable Towns) project. The contributors originate from India, China, Switzerland, Germany, the Netherlands, the United States and France, and come from a variety of different backgrounds, including academic researchers, urban planners, architects, political scientists and practitioners.

F Power Mode Fitness Systematic workout Program for no doubt gives you the best results to achieving a fit body but challenging yourself with new exercises and workouts is a different discussion. When your body gets used to a specific workout program, it loses its effectiveness. For example if you do sit-ups every day in a month and increase the number of reps as days pass, not only it doesn't help your body to burn fats and build muscles, but it makes this exercise easy for your body and it loses its effectiveness. If you always get your body in to new challenges and learn more exercises, for sure, your body is going to be fit. In this book we challenge you and your body to new workouts and exercises. All of the body parts, legs, abs, and upper body... have been categorized in their own section and each section consists of steps. Each step is different from each other and is a challenge for you. From step 1 as you go forward you face new exercises and different levels of reps for each exercise which has been divided to 3 Modes: Minimum, Middle, and Maximum. Each step is a prerequisite for the next one. If you find a step hard, don't rush ahead to the next step. Just practice this one in your workout till you get comfortable with it and then go for the next step. Choose your Specific Body Type workout program that suits your body. Follow along with our workout program and know that if you are serious to be fit, you are in the right way. Remember, always challenge yourself. Website: http://fpowermode.com/ Writer: Mehrshad Dave Graphic Designer: Amir Bahador Zare

This Health Building Note (HBN) provides evidence-based best practice guidance on the design and layout of sanitary spaces for use in healthcare settings. Room sizes have been standardised wherever possible. For areas where a standard room size is not appropriate, this document provides a sizing methodology suitable for briefing purposes. Most of the indicative room layouts are informed by one or more ergonomic drawings. In places, the guidance differs from that provided in Approved Document M (2010) and BS 8300:2001 (2009 edition). Where this is the case, the reasons for the variations are discussed.

Authors posted one picture a day, for a period of 365 days, to capture the zeitgeist of their year.
