The broad and developing scope of ergonomics, the application of scientific knowledge to improve people's interaction with products, systems and environments, has been illustrated over the past sixteen years by the books that make up the Contemporary Ergonomics series. Presenting the proceedings of the Ergonomics Society's Annual Conference, the series embraces the wide range of topics covered by ergonomics. Chapters provide an insight into the current practice, present new research findings and form an invaluable reference source. Among the most interesting topics covered in this volume are rail safety, the development and applications of virtual reality and hospital ergonomics. Contemporary Ergonomics 2002 will appeal to all those who have an interest in people's interactions with their working and leisure environment, including designers, manufacturing and production engineers, health and safety specialists, occupational, applied and industrial psychologists, and applied physiologists.

"Petrus van Staden shares his insights on minerals biotechnology. John Canterford explores plant design and operation. Gordon Bacon discusses the challenges of plant start-ups, and John Marsden offers practical solutions for reducing energy consumption in all aspects of unit operations." "Bob Shoemaker, one of the world's most respected authorities on precious metal recovery, reflects on developments and lessons learned during his half century in the business." "Hundreds of other authors provide insights on acid rock drainage, waste water and resource recovery, process development and modeling, heap leaching, the future role of hydrometallurgy, and countless other timely, important subjects."

This text follows a broad sequence of preparation, characterization, physical and mechanical properties and structure-property relations. *Polymers: Chemistry and Physics of Modern Materials, Second Edition* covers several methods of polymerization, properties, and advanced applications such as liquid crystals and polymers used in the electronics industry. Topics also include Step-Growth, Free Radical Addition, and Ionic Polymerization; Copolymerization; Polymer Stereochemistry and Characterization; Structure-Property Relationship; Polymer Liquid Crystals; and Polymers for the Electronics Industry.

Your everyday food choices can change the world—and make meals taste better than ever For anyone who has read *The Omnivore 's Dilemma* or seen *Food, Inc.* and longs to effect easy green changes when it comes to the food they buy, cook, and eat, *The Conscious Kitchen* is an invaluable resource filled with real world, practical solutions. Alexandra Zissu walks readers through every kitchen-related decision with three criteria in mind: what 's good for personal health, what 's good for the planet, and what tastes great. Learn, among other things, how to: - Keep pesticides, chemicals, and other harmful ingredients out of your diet - Choose when to spend your dollars on organic fruit and when to buy conventionally grown - Avoid plastic—including which kinds in particular and why - Figure out what seafood is safe to eat and is sustainable - Use COOL (country of origin labels) to your advantage - Determine if a vegetable is genetically modified just from reading its PLU (price look up) code - Decipher meat labels in the supermarket - Cook

using the least energy—good for the earth and your wallet - Eat locally, even in winter - Understand what “ natural ” and other marketing terms really mean - Buy packaged foods wisely Navigate farmers ’ markets, giant supermarkets, and every shop in between to find the freshest and healthiest local ecologically grown and produced meat, dairy, fruits, and vegetables—no matter where you live With The Conscious Kitchen as your guide, you will never again stand in the market bewildered, wondering what to buy. You can feel confident you are making the best possible choices for you, your family, and our planet. ALEXANDRA ZISSU writes about green living, food, and parenthood. She is the author of The Conscious Kitchen, coauthor of The Complete Organic Pregnancy, and contributes the “ Ask an Organic Mom ” column to The DailyGreen.com. Her stories have appeared in The New York Times, The Green Guide, Cookie, Details, Bon App é tit, Self, and Health, among other publications. She is also a public speaker and “ greenproofer, ” an eco-lifestyle consultant. Visit her website, [www.alexandrazissu.com](http://www.alexandrazissu.com).

We are what we eat, but we also are what we use to clean our homes, pamper our skin, and decorate our rooms, according to Rene é Loux, accomplished raw food chef, award-winning author, and host of Fine Living TV's Easy Being Green. In her new book, Easy Green Living, she applies her whole-foods philosophy to home, garden, and beauty routines. Rene é Loux demonstrates that being green at home is easy, affordable, and better in every sense of the word. She discusses the daily choices we face that can keep the home, personal care, and beauty routines free of toxins. She exposes the dirt on cleaning products and common hazardous ingredients and reveals her recommendations for greener options, including her "Green Thumb Guides" for choosing non-toxic, eco-smart, and human-friendly products. Peppered with compelling and inspiring facts, Easy Green Living is full of "5 Step" lists, products and recipes for green cleaning, helpful charts, safer choices for every room, and inspirational advice so we can save the planet--one

cleaning spritz at a time. As recent special issues of Vanity Fair, Time, Newsweek, and other major publications have demonstrated, going green is an idea whose time has come. Whether addressing big-picture topics like renewable energy, or offering simple suggestions for everyday living, this complete lifestyle guide shows that healthier choices don't mean a radical or complicated life change--it is, after all, easy to be green.

This book focuses on the fundamental concepts and physical and chemical aspects of pulsed laser ablation of solid targets in liquid environments and its applications in the preparation of nanomaterials and fabrication of nanostructures. The areas of focus include basic thermodynamic and kinetic processes of laser ablation in liquids, and its applications in metal and metal oxides nanocrystals synthesis and semiconductor nanostructures fabrication. The book comprises theoretical and experimental analysis of laser ablation in liquids, research methods, and preparation techniques.

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Materials syntheses are more complex than syntheses of inorganic or organic compounds. Materials synthesis protocols often suffer from unclarities, irreproducibility, lack in detail and lack in standards. The need to change this situation is the main motivation for this book. It collects a number of detailed protocols, ranging from organic polymers to carbonaceous and ceramic materials, from gels to porous and layered materials
