Swept up as a child in the events of Nazi-era Europe, Ruth Kluger saw her family's comfortable Vienna existence systematically undermined and destroyed. By age eleven, she had been deported, along with her mother, to Theresienstadt, the first in a series of concentration camps which would become the setting for her precarious childhood. Kluger's story of her years in the camps and her struggle to establish a life after the war as a refugee survivor in New York, has emerged as one of the most powerful accounts of the Holocaust. Interwoven with blunt, unsparing observations of childhood and nuanced reflections of an adult who has spent a lifetime thinking about the Holocaust, *Still Alive* rejects all easy assumptions about history, both political and personal. Whether describing the abuse she met at her own mother's hand, the life-saving generosity of a woman SS aide in Auschwitz, the foibles and prejudices of Allied liberators, or the cold shoulder offered by her relatives when she and her mother arrived as refugees in New York, Kluger sees and names an unexpected reality which has little to do with conventional wisdom or morality tales. *Still Alive* is a memoir of the pursuit of selfhood against all odds, a fiercely bittersweet coming-of-age story in which the protagonist must learn never to rely on comforting assumptions, but always to seek her own truth.

From clandestine images of Jewish children isolated in Nazi ghettos and Japanese American children incarcerated in camps to images of Native children removed to North American boarding schools, classroom photographs of schoolchildren are pervasive even in repressive historical and political contexts. *School Photos in Liquid Time* offers a closer look at this genre of vernacular photography, tracing how photography advances ideologies of social assimilation as well as those of hierarchy and exclusion. In Marianne Hirsch and Leo Spitzer 's deft analysis, school photographs reveal connections between the histories of persecuted subjects in different national and imperial centers. Exploring what this ubiquitous and mundane but understudied genre tells us about domination as well as resistance, the authors examine school photos as documents of social life and agents of transformation. They place them in dialogue with works by contemporary artists who reframe, remediate, and elucidate them. Ambitious yet accessible, *School Photos in Liquid Time* presents school photography as a new access point into institutions of power, revealing the capacity of past and present actors to disrupt and reinvent them.

The provocative title of this book plays on a too-familiar response from teachers and students alike. But now many teachers have begun to seek an approach to social studies that takes account of the ways children learn and that builds on their own knowledge and strengths. The authors in this book have found ways to do this. Wendy Hood writes in the

Introduction that they have “ . . . not only rediscovered social studies education in general, they have also found themselves exploring the many disciplines of the social sciences that combine to make social studies . . . The issues of the disciplines are visible, the content of the disciplines is visible, and the questions central to each discipline are central in these classrooms. While the studies described began in one discipline, they branched out or melted into one or more of the others. ” In this contributed collection, twenty-three teachers explain their successful strategies for teaching the social studies disciplines in a whole- language context. If This Is Social Studies covers contemporary subjects (the Gulf War), traditional topics (students as historians), well-known projects (Scottish Storyline), social studies in the community, and multicultural matters. Teachers at elementary through middle and high school levels will find this book's holistic approach to social studies a refreshing departure and a source of new, practical ideas. Indeed, the diversity of ideas and styles is as broad as the book's subject!

'Excellent ... an astounding amount of material.' Times Educational Supplement Popular culture often portrays the Holocaust as a horrific drama played out between Nazi executioners and ghetto Jewish victims - in short, a single aberration of history. Introducing the Holocaust is a powerful graphic guide that dissolves this stereotype, explaining the causes and its relevance today. It places the Holocaust where it belongs - at the centre of modern European and world history. Haim Bresheeth and Stuart Hood - along with Litza Jansz's outstanding illustrations - bring a unique and unforgettable perspective to how we think about this most dark of shadows on human history.

Highlighting Hood ' s year spent fighting with the Italian Resistance during the Second World War, the essays consider how his experiences as a partisan influenced his peacetime trajectory. Written by distinguished scholars from several disciplines, each chapter examines different aspects of Hood ' s life and work, including his Scottish boyhood and university education in Edinburgh; his distinguished career as a broadcaster presiding over an era of unprecedented creativity at BBC television; his role in the establishment of the discipline of media studies; and his contribution to radical European culture as the translator of 40 literary works from Italian, German, French and Russian, and as the author of eight acclaimed novels. Stuart Hood ' s reticence made him an enigma to many who knew him. This collection assesses his many-faceted achievements, demonstrating how his life provides fresh insights into twentieth-century European history. This book will appeal to readers interested in the history of British and European socialism, media studies and literature.

In *Aversion and Erasure*, Carolyn J. Dean offers a bold account of how the Holocaust's status as humanity's most terrible example of evil has shaped contemporary discourses about victims in the West. Popular and scholarly attention to the Holocaust has led some observers to conclude that a "surfeit of Jewish memory" is obscuring the suffering of other peoples. Dean explores the pervasive idea that suffering and trauma in the United States and Western

Europe have become central to identity, with victims competing for recognition by displaying their collective wounds. She argues that this notion has never been examined systematically even though it now possesses the force of self-evidence. It developed in nascent form after World War II, when the near-annihilation of European Jewry began to transform patriotic mourning into a slogan of "Never Again": as the Holocaust demonstrated, all people might become victims because of their ethnicity, race, gender, or sexuality—because of who they are. The recent concept that suffering is central to identity and that Jewish suffering under Nazism is iconic of modern evil has dominated public discourse since the 1980s. Dean argues that we believe that the rational contestation of grievances in democratic societies is being replaced by the proclamation of injury and the desire to be a victim. Such dramatic and yet culturally powerful assertions, however, cast suspicion on victims and define their credibility in new ways that require analysis. Dean's latest book summons anyone concerned with human rights to recognize the impact of cultural ideals of "deserving" and "undeserving" victims on those who have suffered.
