Tangram puzzles come in the form of silhouettes or outlines that are constructed by combining all seven tans. The object of the game is to re-create these shapes by figuring out the orientation of each tan. In books of puzzles, the solutions (or completed tangrams) show the outlines of the individual tans, but the puzzles don't.

In 1815, American Captain M. Donaldson was given a pair of author Sang-Hsia-koi's books on the subject (one problem and one solution book) when his ship, Trader docked there. They were then brought with the ship to Philadelphia, in February 1816. The first tangram book to be published in America was based on the pair brought by Donaldson.

Grandfather tells a story about shape-changing fox fairies who try to best each other until a hunter brings danger to both of them.

The objects displayed on a table can take multiple forms. In meetings, it is still very often printed paper although its content was originally created on a computer. The content can also be a "table", but now in the mathematical sense, showing, e. g. , the budget of a project. Then, we have a "table" on the table. Most often, the computer-generated contents are subject of frequent changes or dynamic in nature. It is a logical consequence to avoid the detour and the inherent media break by transforming the surface of the table into a display able to show media that are active and can be computer-generated and computer-controlled. At the same time, it is desirable to maintain the inherent features and affordances of working with the objects and the contents while sitting or standing around a table. Electronic Meeting Rooms On the basis of these and other elaborate considerations, we started to design in 1992/1993 an electronic meeting room in Darmstadt at GMD-IPSI (later Fraunhofer IPSI). The setup of our custom-built DOLPHIN-System consisted of a "traditional" large rectangular wooden table with four physically integrated workstation-like computers with at screens. This set-up was complemented by linking a large vertical pen-operated interactive display, at that time the first LiveBoard outside of Xerox PARC (two of which I was able to get to Darmstadt after my stay at Xerox PARC in 1990).

Use technology to increase loyalty and productivity in your employees 50 Digital Team-Building Games offers fun, energizing meeting openers, team activities, and group adventures for business teams, using Twitter, GPS, Facebook, smartphones, and other technology. The games can be played in-person or virtually, and range from 5-minute ice-breakers to an epic four-hour GPS-based adventure. Designed to be lead by managers, facilitators, presenters, and speakers, the activities help teams and groups get comfortable with technology, get to know each other better, build trust, improve communication, and more. No need to be a "techie" to lead these games they're simple and well-scripted. Author John Chen is the CEO of Geoteaming, a company that uses technology and adventure to teach teams how to collaborate. How to lead a simple, fast, fun team building activity with easy-to-follow instructions How to create successful "virtual" team building that requires NO travel and little to no additional expenses How to engage standoffish engineers, "hard to reach" technical teams, or Gen X/Y teammates with technology they enjoy using Successful technology-based team building can build buzz for your company, build critically important relationships and communication internally, and keep your team talking about it for weeks afterward!

Mathematics is one of the most important life skills a person can have. Hence, it is essential that it is taught in a way which enables the student to gain an excellent foundation in maths and the skills needed to use maths in a wide variety of applications. This book aims to be an important aid in achieving this by providing over 500 problems with worked solutions at GCSE level, for the student to study. Solutions are given in detail, this is to enable the student to check their progress and understanding of the topic and to iron out any difficulties they may encounter. The book is organised in two volumes. The layout of the chapters is such that after a brief summary of the topic, the book goes onto provide a number of questions in each subject along with the worked solution. The questions chosen are intended to build the knowledge and skills needed for GCSE level maths. Finally the last chapter of the volume consists of typical questions and solutions that may arise in a GCSE maths exam.

This book constitutes the proceedings of the 22nd International Conference on Speech and Computer, SPECOM 2020, held in St. Petersburg, Russia, in October 2020. The 65 papers presented were carefully reviewed and selected from 160 submissions. The papers present current research in the area of computer speech processing including speech science, speech technology, natural language processing, human-computer interaction, language identification, multimedia processing, human-machine interaction, deep learning for audio processing, computational paralinguistics, affective computing, speech and language resources, speech translation systems, text mining and sentiment analysis, voice assistants, etc. Due to the Corona pandemic SPECOM 2020 was held as a virtual event.

Tangrams are ancient Chinese, ingenious puzzles. They are deceptively simple in design, yet can stump even the most

seasoned of puzzlers. Then, the light clicks on and the answer suddenly seems so obvious. It's amazing that so many puzzles can be solved with the exact same 7 shapes. Beyond the Tangram: From the inventor of Tangram Fury, comes a Tangram Fury Christmas Activity Book. This book is chalk full of Christmas-themed tangrams to solve, but takes them a step further arranging them within fun activities. Just like the other books in the Tangram Fury puzzle series, it has a series of puzzles arranged to show a silhouetted puzzle, followed by its solution. Then it additional activities such as a tangram matching game, tangram Christmas ornaments to design and decorate, tangram Christmas paradoxes to solve, a couple Daily Tangram puzzles, and more. Cut the activities directly out of the book, or photocopy them on sturdy, colored paper for enhanced play. Following a brief introduction to tangrams, the main portion of the book provides challenging or whimsical Christmas-theme puzzles to solve, and their solutions, and the activities. This is followed by tidbits and trivia about tangrams and some famous people who have tinkered with tangrams over the years. (Can you solve the unsolvable "Mad Hatter" tangram created by Lewis Carroll?) It also provides some tips and suggestions for those with a competitive streak. The text sections of the books are largely the same in all books in the series, but the heart of the book - the part that includes the tangram puzzles - remains unique. This book series was featured on the NewsWatch TV program on Discovery Channel: <http://newswatchtv.com/2015/12/18/tangram-fury/> Whatever time of year it is, 'tis the season for some Tangram fun!

This volume comprises an imaginative collection of pieces created in tribute to Martin Gardner. Perhaps best known for writing Scientific American's "Mathematical Games" column for years, Gardner used his personal exuberance and fascination with puzzles and magic to entice a wide range of readers into a world of mathematical discovery. This tribute

Use these hands-on activities to promote critical thinking and problem-solving skills. Every activity helps students develop their shape recognition and spatial relationship skills. Excellent for activity centers. Includes 16 - 8 1/2" x 11" (21.5 x 28cm) cards, double-sided and coated for durability, and an activity sheet.
