**Part 1 Troubleshooting
Briggs Stratton Small Engine**
Disconnected, dirty or fouled spark plugs are common causes for engines that won't start. For small engines, spark plugs typically need to be replaced every season or after 25 hours of use. You should also check to make sure the spark plug gap is set correctly. An improper spark plug gap could lead to engine knocking and poor performance.

There are two main ways you can tell that your Briggs & Stratton governor may need to be adjusted. The first is if your engine is consistently running too fast or too slow. The second is if your engine surges or slows dramatically for no apparent reason. The main reason a governor could require adjustment is simply through use over time.
