Essay Writing offers both staff and students a solid reference for one of the main methods used for assessing knowledge and understanding 📄 the written essay. In contextualizing essay writing within the larger university experience 📄 communication, the academic culture, different learning styles and approaches and learning and teaching at university, this book helps students to study more independently, learn more meaningfully and to write first-class essays.

Lecturers, request your electronic inspection copy here Writing for Academic Success is a vital practical guide for any ambitious student. If you seek to manage your writing effectively, reduce stress, and improve your confidence and efficiency, this book is for you. The authors show you how to acquire communicative rigor in research essays, reports, book and article reviews, exam papers, research proposals, and literature reviews, through to thesis writing, posters and papers for presentation and publication. This second edition has been fully revised to reflect the online learning explosion. The authors provide insightful new material about how to work productively in different online contexts such as with blogs and wikis, setting up an e-portfolio, and raising an online profile. They also set out a focused guide to issues unique to digital communication, and working with and across different media and technologies. The book includes advice on common writing concerns, cross-cultural and inter-disciplinary practices, a list of helpful words and phrases, and subject-specific examples of writing ranging from economics to philosophy to medicine. Writing for Academic Success is essential for undergraduate and postgraduate students both in taught courses and conducting research. The Student Success series are essential guides for students of all levels. From how to think critically and write great essays to planning your dream career, the Student Success series helps you study smarter and get the best from your time at university. Visit the SAGE Study Skills hub for tips and resources for study success!

Observations Plus Recipes It has been said that science is the orderly collection of facts about the natural world. Scientists, however, are wary of using the word "fact." 📄 "Fact" has the feeling of absoluteness and universality, whereas scientific observations are neither ab- lute nor universal. For example, "children have 20 deciduous [baby] teeth" is an observation about the real world, but scientists would not call it a fact. Some children have fewer deciduous teeth, and some have more. Even those children who have exactly 20 deciduous teeth use the full set during only a part of their childhood. When they are babies and t- dlers, children have less than 20 visible teeth, and as they grow older, children begin to loose their deciduous teeth, which are then replaced by permanent teeth. "Children have 20 deciduous [baby] teeth" is not even a complete scientific sta- ment. For one thing, the statement "children have 20 deciduous teeth" does not tell us what we mean by "teeth." 📄 When we say "teeth," do we mean only those that can seen be with the unaided eye, or do we also include the hidden, unerupted teeth? An observation such as "children have 20 deciduous teeth" is not a fact, and, by itself, it is not acceptable as a scientific statement until its terms are explained: scientifically, "children have 20 deciduous teeth" must be accompanied by definitions and qualifiers.

An exploration of strategies for writing up the same research in different ways - preparing the writer for approaching and addressing diverse audiences.

Living in a "perfect" world without social ills, a boy approaches the time when he will receive a life assignment from the Elders, but his selection leads him to a mysterious man known as the Giver, who reveals the dark secrets behind the utopian facade.

The struggle of three brothers to stay together after their parent's death and their quest for identity among the conflicting values of their adolescent society.

This brief rhetoric helps students develop strategies for critical reading, critical thinking, research, and writing that will help them argue clearly and convincingly. It teaches them to identify and develop arguments, to read and form reactions and opinions of their own, to analyze an audience, to seek common ground, and to use a wide, realistic range of techniques to write argument papers that express their individual views and original perspectives on modern issues. It includes clear explanations and examples of argument theory and reading and writing processes, research and documentation skills, and offers engaging, class-tested writing assignments and activities. 49 Essays for Analysis cover several broad issue and sub-issue areas, all of contemporary concern. Unique chapters discuss student argument styles, Rogerian argument, and argument and literature.

Robert Stebbins addresses an area of social science that receives scant attention: exploration as a methodological process. The author emphasises its importance then leads the reader through the process in a highly readable way.

Writing in Response is a flexible, brief rhetoric that offers a unique focus on the critical practices of experienced readers'analysis and reflection"the skills at the heart of academic writing. It helps students compose academic essays by showing how active reading and exploratory writing bring fresh ideas to light and how informal response is developed into polished, documented prose. Extensively class tested, Writing in Response emphasizes the key techniques common to reading, thinking, and writing throughout the humanities and social sciences by teaching students the value of a social, incremental, and recursive writing process. Read the preface.
